INDEX TO AUTHORS

ADELMAN, WILLIAM J., JR. The effect of external calcium and magnesium depletion on single nerve fibers, 753

ALDERDICE, D. F. See IDLER, FAGERLUND, and MAYOH, 889

ALLFREY, V. G. See DALY, ALLFREY, and MIRSKY, 207

ARNOLD, WILLIAM, and THOMPSON, JANE. Delayed light production by blue-green algae, red algae, and purple bacteria, 311

BARRETO, DELIA. See PONDER and BARRETO, 23, 319

BERGLUND, FREDRIK. See FORSTER and BERGLUND, 349

BERMAN, MORRIS D. See SHANES and BERMAN, 279

BONNER, JAMES. See Ts'O, BONNER, EGGMAN, and VINOGRAD, 325

BOZLER, EMIL. The effect of polyphosphates and magnesium on the mechanical properties of extracted muscle fibers, 789

BRANDT, C. L., and GIESE, A. C. Photoreversal of nuclear and cytoplasmic effects of short ultraviolet radiation on *Paramecium caudatum*, 735

BRETT, J. R. See IDLER, FAGERLUND, and MAYOH, 889

CARLSEN, E. See TOSTESON, CARLSEN, and DUNHAM, 31

CASTAÑEDA-AGULLÓ, M. Northrop's phenomenon. The digestion of proteins by enzymes in the presence of gelatin, 361

—. Studies on the biosynthesis of extracellular proteases by bacteria. I. *Serratia marcescens*. Synthetic and gelatin media, 369

CHELDELIN, VERNON H. See HOSKINS, CHELDELIN, and NEWBURGH, 705

CHRISTENSEN, E., and GIESE, A. C. Increased photoreversal of ultraviolet injury by flashing light, 513

CRESCITELLI, FREDERICK. The nature of the lamprey visual pigment, 423

DALY, M. M., ALLFREY, V. G., and MIRSKY, A. E. Synthesis of protein in the pancreas. III. Uptake of glycine-N^{15} by the trypsinogen and chymotrypsinogen of mouse pancreas, 207

DANIELS, FARRINGTON. See YUAN and DANIELS, 527

DEYRUP, INGRITH J. Further observations on uptake of S^{35}-labelled sulfate by renal tissue *in vitro*, 893

DUNHAM, E. T. See TOSTESON, CARLSEN, and DUNHAM, 31

DURBIN, RICHARD P., FRANK, HEDDY, and SOLOMON, A. K. Water flow through frog gastric mucosa, 535

EGGMAN, LUTHER. See Ts'O, BONNER, EGGMAN, and VINOGRAD, 325

—. See Ts'O, EGGMAN, and VINOGRAD, 801

EYZAGUIRRE, CARLOS, and KUFFLER, STEPHEN W. Further study of soma, dendrite, and axon excitation in single neurons, 121

— and —. Processes of excitation in the dendrites and in the soma of single isolated sensory nerve cells of the lobster and crayfish, 87

EYZAGUIRRE, CARLOS. See KUFFLER and EYZAGUIRRE, 155

FAGERLUND, U. H. M. See IDLER, FAGERLUND, and MAYOH, 889

FLOREY, ELISABETH, and FLOREY, ERNST. Microanatomy of the abdominal stretch receptors of the crayfish (*Astacus fluviatilis* L.), 69

FLOREY, ERNST. See FLOREY and FLOREY, 69

FORSTER, ROY P., and BERGLUND, FREDRIK. Osmotic diuresis and its effect on total electrolyte distribution in plasma and urine of the aglomerular teleost, *Lophius americanus*, 349

FOULKES, ERNEST C. Cation transport in yeast, 687

FOX, MAURICE S. Mutation rates of bacteria in steady state populations, 267

— and SZILARD, LEO. A device for growing bacterial populations under steady state conditions, 261

FRANK, HEDDY. See DURBIN, FRANK, and SOLOMON, 535

FREYGANG, W. H., JR. See TASAKI and FREYGANG, 211

GASSER, HERBERT S. Olfactory nerve fibers, 473

GIESE, A. C. See BRANDT and GIESE, 735

—. See CHRISTENSEN and GIESE, 513

GOSSELIN, ROBERT E. The uptake of radiocolloids by macrophages *in vitro*. A kinetic analysis with radioactive colloidal gold, 625

GREGG, JAMES H. Serological investigations of cell adhesion in the slime molds, *Dictyostelium discoideum*, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, 813

HADIDIAN, Z., and MURPHY, MARGUERITE M. The interactions of the non-specific inhibitor of hyaluronidase with hyaluronidase and proteolytic enzymes *in vivo*, 185

HANSON, JEAN. See MOMMAERTS and HANSON, 831

HARTLINE, H. K., WAGNER, HENRY G., and RATLIFF, FLOYD. Inhibition in the eye of *Limulus*, 651

HOSKINS, DALE D., CHELDELIN, VERNON H., and NEWBURGH, R. W. Oxidative enzyme systems of the honey bee, *Apis mellifera* L., 705

HUBBARD, RUTH. Retinene isomerase, 935

HUNT, CARLTON C. See RALL and HUNT, 397

HUTTER, OTTO F., and TRAUTWEIN, WOLFGANG. Vagal and sympathetic effects on the pacemaker fibers in the sinus venosus of the heart, 715

HYATT, M. T. See MANDELS, LEVINSON, and HYATT, 301

IDLER, D. R., FAGERLUND, U. H. M., and MAYOH, HELEN. Olfactory perception in migrating salmon. I. L-Serine, a salmon repellent in mammalian skin, 889

JENERICK, HOWARD PETER. The relations between prepotential, resting potential, and latent period in frog muscle fibers, 773

JENSEN, DAVID, and TARVER, HAROLD. Protein synthesis in the perfused rat liver, 567

WOLBACH, ROBERT A. See RIGGS and WOLBACH, 585
WOLKEN, J. J., AND MELLON, A. D. The relationship between chlorophyll and the carotenoids in the algal flagellate, *Euglena*, 675
WYATT, G. R., LOUGHHEED, T. C., and WYATT, S. S. The chemistry of insect hemolymph. Organic components of the hemolymph of the silkworm, *Bombyx mori*, and two other species, 853
WYATT, S. SILVER. Culture *in vitro* of tissue from the silkworm, *Bombyx mori* L., 841
—. See WYATT, LOUGHHEED, and WYATT, 853

YUAN, EDWARD LUNG, and DANIELS, FARRINGTON. The effects of some inhibitors on the rates of photosynthesis and respiration by *Chlorella*, 527

INDEX TO SUBJECTS

ABDOMINAL stretch receptors of crayfish, *Astacus fluviatilis* L., microanatomy, 69

Absorption, ultraviolet, hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437

Acid and base properties of rhodopsin and opsin, 909

— and base titration results, hydrogen ion concentration, particle asymmetry, irreversible binding of methylene blue, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437

— synthesis, deoxyribonucleic, effect of chloramphenicol, and development of resistance to ultraviolet irradiation in *Escherichia coli* infected with bacteriophage T2, 553

Actomyosin, effect of stoichiometric amounts of adenosinetriphosphate regenerated in coupled enzyme system upon, 831

— solutions, effect of adenosinetriphosphate, studied with recording dual beam light-scattering photometer, 821

Adenosinetriphosphate, effect on actomyosin solutions, studied with recording dual beam light-scattering photometer, 821

—, stoichiometric amounts regenerated in coupled enzyme system, effect upon actomyosin, 831

Adenosinetriphosphate-sensitive protein, myxomyosin, isolation from plasmodium of myxomycete, 801

— protein system from myxomycete plasmodia, 325

Aging and hydrogen ion concentration, effects on stability of rhodopsin and opsin, 923

— and wing beat frequency of flies, mitochondrial cytochrome *c* in insect flight muscles in relation to, 497

Alga, blue-green, relations between pigment content and photosynthetic characteristics in, 11

Algae, blue-green and red, and purple bacteria, delayed light production by, 311

Algal flagellate, *Euglena*, relationship between chlorophyll and carotenoids in, 675

Ammonium sulfate culture medium, appearance of new bacteriophage types and new lysogenic strains after adaptation of lysogenic *Bacillus megatherium* to, 607

Anatomy, micro-, of abdominal stretch receptors of crayfish, *Astacus fluviatilis* L., 69

Apis mellifera L., oxidative enzyme systems, 705

Aspergillus flavus spores, effects of subzero temperatures on viability, effect of rate of warming, 869

Astacus fluviatilis L., microanatomy of abdominal stretch receptors, 69

Axon, soma, and dendrite excitation in single neurons, 121

—, squid giant, kinetics of ion movement in, 279

BACILLUS *megatherium* bacteriophage, concentration and purification, 259
— *megatherium* bacteriophage, inactivation and reactivation, 225
— *megatherium* and fungus *Myrothecium verrucaria*, analysis of respiration during germination and enlargement of spores of, 301
— *megatherium*, lysogenic, adaptation to ammonium sulfate culture medium, appearance of new bacteriophage types and new lysogenic strains after, 607
Bacteria, biosynthesis of extracellular proteases by, 369
—, mutation rates in steady state populations, 267
—, purple, and blue-green and red algae, delayed light production by, 311
Bacterial populations, device for growing under steady state conditions, 261
Bacteriophage, *Bacillus megatherium*, concentration and purification, 259
—, *Bacillus megatherium*, inactivation and reactivation, 225
—, *megatherium*, active, inactive, and reversibly inactivated, effect of trypsin, chymotrypsin, ribonuclease, and desoxyribonuclease on, 251
— T2, effect of chloramphenicol on deoxyribonucleic acid synthesis, and development of resistance to ultraviolet irradiation in *Escherichia coli* infected with, 553
— types, new, and new lysogenic strains, appearance after adaptation of lysogenic *Bacillus megatherium* to ammonium sulfate culture medium, 607
Base and acid properties of rhodopsin and opsin, 909
— and acid titration results, hydrogen ion concentration, particle asymmetry, irreversible binding of methylene blue, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Bee, honey, oxidative enzyme systems, 705
Biosynthesis of extracellular proteases by *Serratia marcescens*, synthetic and gelatin media, 369
Birefringence of human red cell ghosts, 319
Blood cell, red. *See* Erythrocyte.
Bombyx mori L., *in vitro* culture of tissue from, 841
— *mori*, organic components of hemolymph, 853

CALCIUM and magnesium depletion, external, effect on single nerve fibers, 753
Carotenoids and chlorophyll in algal flagellate *Euglena*, relationship between, 675
Cation transport in yeast, 687
Cell adhesion in slime molds, *Dictyostelium discoideum*, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, serological investigations, 813
—, nerve, isolated, synaptic inhibition in, 155
Cells, blood, red. *See* Erythrocyte.
—, extracellular proteases, biosynthesis by *Serratia marcescens*, synthetic and gelatin media, 369
—, nerve, sensory, single isolated, of lobster and crayfish, processes of excitation in dendrites and in soma, 87
Cesium and sodium transport, effect of sickling, 55
Chemistry of insect hemolymph, organic components of hemolymph of silkworm, *Bombyx mori*, and two other species, 853
Chloramphenicol, effect on deoxyribonucleic acid synthesis, and development of resistance to ultraviolet irradiation in *Escherichia*

coli infected with bacteriophage T2, 553
Chlorella, photosynthesis and respiration rates, effects of inhibitors on, 527
Chlorophyll and carotenoids in algal flagellate, *Euglena*, relationship between, 675
Chymotrypsin, trypsin, ribonuclease, and desoxyribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
Chymotrypsinogen and trypsinogen of pancreas, uptake of glycine labelled with radioactive nitrogen by, 207
Colloidal gold, radioactive, kinetic analysis of *in vitro* uptake of radiocolloids by macrophages with, 625
Colloids, radio-, *in vitro* uptake by macrophages, kinetic analysis with radioactive colloidal gold, 625
Corpuscular hemoglobin concentration in human red cell, variation measured by densitometry, 23
Crayfish, *Astacus fluviatilis* L., microanatomy of abdominal stretch receptors, 69
— and lobster, processes of excitation in dendrites and in soma of single isolated sensory nerve cells of, 87
Cultivation *in vitro* of tissue from silkworm, *Bombyx mori* L., 841
— medium, ammonium sulfate, appearance of new bacteriophage types and new lysogenic strains after adaptation of lysogenic *Bacillus megatherium* to, 607
Cytochrome *c*, mitochondrial, in insect flight muscles, in relation to aging and wing beat frequency of flies, 497
Cytoplasmic and nuclear effects of short ultraviolet radiation on *Paramecium caudatum*, photoreversal, 735
DENDRITE, soma, and axon excitation in single neurons, 121
Dendrites and soma of single isolated sensory nerve cells of lobster and crayfish, processes of excitation in, 87
Densitometry, variation in corpuscular hemoglobin concentration in human red cell measured by, 23
Deoxyribonucleic acid synthesis, effect of chloramphenicol, and development of resistance to ultraviolet irradiation in *Escherichia coli* infected with bacteriophage T2, 553
Desoxyribonuclease, trypsin, chymotrypsin, and ribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
Diatoms, silicon metabolism, respiration and silicon uptake in *Navicula pelliculosa*, 1
Dictyostelium discoideum, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, serological investigations of cell adhesion in, 813
— *purpureum*, *Dictyostelium discoideum*, and *Polysphondylium violaceum*, serological investigations of cell adhesion in, 813
Digestion of proteins by enzymes in presence of gelatin, 361
Diuresis, osmotic, effect on total electrolyte distribution in plasma and urine of aglomerular teleost, *Lophius americanus*, 349
Dye binding, basic, and aggregation reactions of tobacco mosaic virus, variation of hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437

ELECTROLYTE distribution, total, in plasma and urine of aglomerular teleost, *Lophius americanus*, osmotic diuresis and effect on, 349
Enzyme system, coupled, effect upon actomyosin of stoichiometric amounts of adenosinetriphosphate regenerated in, 831
— systems, oxidative, of honey bee, *Apis mellifera* L., 705
Enzymes, digestion of proteins in presence of gelatin by, 361
—, proteolytic, interactions *in vivo* of non-specific inhibitor of hyaluronidase with hyaluronidase and, 185
Erythrocyte, human, variation in corpuscular hemoglobin concentration measured by densitometry, 23
Erythrocytes, human, birefringence of ghosts, 319
Escherichia coli infected with bacteriophage T2, effect of chloramphenicol on deoxyribonucleic acid synthesis and development of resistance to ultraviolet irradiation in, 553
Euglena, relationship between chlorophyll and carotenoids in, 675
Excitability fluctuation, partially correlated, in population of motoneurons, analysis of reflex variability in terms of, 397
Excitation in dendrites and in soma of single isolated sensory nerve cells of lobster and crayfish, processes, 87
—, soma, dendrite, and axon, in single neurons, 121
Eye, *Limulus*, inhibition, 651

FIBERS, muscle, extracted, mechanical properties, effect of polyphosphates and magnesium on, 789
—, muscle, frog, relations between prepotential, resting potential, and latent period in, 773
Fibers, nerve, single, effect of external calcium and magnesium depletion on, 753
—, olfactory nerve, 473
—, pacemaker, in sinus venosus of heart, vagal and sympathetic effects, 715
Flagellate, algal, *Euglena*, relationship between chlorophyll and carotenoids in, 675
Flies, aging and wing beat frequency, mitochondrial cytochrome *c* in insect flight muscles in relation to, 497
Flight muscles of insects, mitochondrial cytochrome *c* in relation to aging and wing beat frequency of flies, 497
Fungus, *Myrothecium verrucaria*, and *Bacillus megatherium*, analysis of respiration during germination and enlargement of spores of, 301

GASTRIC mucosa, frog, water flow through, 535
Gelatin, digestion of proteins by enzymes in presence of, 361
— and synthetic media, biosynthesis of extracellular proteases by *Serratia marcescens*, 369
Germination and enlargement of spores of *Bacillus megatherium* and of fungus *Myrothecium verrucaria*, analysis of respiration during, 301
Glycine labelled with radioactive nitrogen, uptake by trypsinogen and chymotrypsinogen, 207
Gold, radioactive colloidal, kinetic analysis of *in vitro* uptake of radiocolloids by macrophages with, 625

HEART, sinus venosus, vagal and sympathetic effects on pacemaker fibers in, 715
Heat denaturation, extent, hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methyl-

ene blue, and ultraviolet absorption, variation in tobacco mosaic virus solutions with time of standing, 437
Hemoglobin, corpuscular, concentration in human red cell, variation measured by densitometry, 23
— structure and sulfhydryl groups, 585
Hemolymph, insect, chemistry, organic components of hemolymph of silkworm, *Bombyx mori*, and two other species, 853
Honey bee, *Apis mellifera* L., oxidative enzyme systems, 705
Hyaluronidase, non-specific inhibitor, interactions with, and with proteolytic enzymes *in vivo*, 185
Hydrogen ion concentration and aging, effects on stability of rhodopsin and opsin, 923
— ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437

INSECT hemolymph, chemistry, organic components of hemolymph of silkworm, *Bombyx mori*, and two other species, 853
Insects, flight muscles, mitochondria, cytochrome *c* in relation to aging and wing beat frequency of flies, 497
Ion concentration, hydrogen, and aging, effects on stability of rhodopsin and opsin, 923
— concentration, hydrogen, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Ion movement in squid giant axon, kinetics, 279
— transport, effects of sickling, 31, 55
Irradiation, ultraviolet, in *Escherichia coli* infected with bacteriophage T2, effect of chloramphenicol on deoxyribonucleic acid synthesis, and development of resistance to, 553
Isomerase, retinene, 935

KIDNEY tissue, *in vitro* uptake of sulfate labelled with radioactive sulfate by, 893
Kinetic analysis with radioactive colloidal gold of *in vitro* uptake of radiocolloids by macrophages, 625
Kinetics of ion movement in squid giant axon, 279

LAMPREY visual pigment, nature, 423
Light, flashing, increased photoreversal of ultraviolet injury by, 513
— production, delayed, by blue-green algae, red algae, and purple bacteria, 311
Light-scattering photometer, recording dual beam, effect of adenosinetriphosphate on actomyosin solutions studied with, 821
Limulus eye, inhibition, 651
Liver, rat, perfused, protein synthesis in, 567
Lobster and crayfish, processes of excitation in dendrites and in soma of single isolated sensory nerve cells of, 87
Lophius americanus, osmotic diuresis and effect on total electrolyte distribution in plasma and urine of, 349
Lysogenic strains, new, and new bacteriophage types, appearance after adaptation of lysogenic *Bacillus megatherium* to ammonium sulfate culture medium, 607

MACROPHAGES, *in vitro* uptake of radiocolloids by, kinetic analysis with radioactive colloidal gold, 625
Magnesium and calcium depletion, external, effect on single nerve fibers, 753
— and polyphosphates, effect on mechanical properties of extracted muscle fibers, 789
Mammalian skin, L-serine, salmon repellent in, 889
Man, red cell ghosts, birefringence, 319
—, red cell, variation in corpuscular hemoglobin concentration measured by densitometry, 23
Media, synthetic and gelatin, biosynthesis of extracellular proteases by *Serratia marcescens*, 369
Medium, ammonium sulfate culture, appearance of new bacteriophage types and new lysogenic strains after adaptation of lysogenic *Bacillus megatherium* to, 607
Megatherium bacteriophage, active, inactive, and reversibly inactivated, effect of trypsin, chymotrypsin, ribonuclease, and desoxyribonuclease on, 251
Membrane resistance, action potential, and action current at node of Ranvier, parallelism between, 211
Metabolism, silicon, in diatoms, respiration and silicon uptake in *Navicula pelliculosa*, 1
Methylene blue, irreversible binding, hydrogen ion concentration, particle asymmetry, acid and base titration results, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Microanatomy of abdominal stretch receptors of crayfish, *Astacus fluviatilis* L., 69
Mitochondria in flight muscles of insects, mitochondrial cytochrome *c* in relation to aging and wing beat frequency of flies, 497
Mitochondrial cytochrome *c* in insect flight muscles, in relation to aging and wing beat frequency of flies, 497
Molds, slime, *Dictyostelium discoideum*, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, serological investigations of cell adhesion, 813
Mosaic virus, tobacco, aggregation reactions and basic dye binding, variation of hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Motoneurons, analysis of reflex variability in terms of partially correlated excitability fluctuation in population of, 397
Mucosa, gastric, frog, water flow through, 535
Muscle fibers, extracted, mechanical properties, effect of polyphosphates and magnesium on, 789
— fibers, frog, relations between prepotential, resting potential, and latent period in, 773
Muscles, flight, of insects, mitochondrial cytochrome *c* in relation to aging and wing beat frequency of flies, 497
Mutation rates of bacteria in steady state populations, 267
Myrothecium verrucaria and *Bacillus megatherium*, analysis of respiration during germination and enlargement of spores of, 301
Myxomycete plasmodia, adenosinetriphosphate-sensitive protein system from, 325
—, plasmodium, isolation of myxomyosin, adenosinetriphosphate-sensitive protein from, 801
Myxomyosin, adenosinetriphosphate-

sensitive protein, isolation from plasmodium of myxomycete, 801

NAVICULA *pelliculosa*, respiration and silicon uptake in, 1
Nerve cell, isolated, synaptic inhibition in, 155
— cells, sensory, single isolated, of lobster and crayfish, processes of excitation in dendrites and in soma, 87
— fibers, olfactory, 473
— fibers, single, effect of external calcium and magnesium depletion on, 753
Neurons, single, soma, dendrite, and axon excitation in, 121
Nitrogen, radioactive, glycine labelled with, uptake by trypsinogen and chymotrypsinogen, 207
Node, Ranvier, parallelism between action potential, action current, and membrane resistance at, 211
—, Ranvier, single, action potential, initiation and abolition, 377
Northrop's phenomenon, digestion of proteins by enzymes in presence of gelatin, 361
Nuclear and cytoplasmic effects of short ultraviolet radiation on *Paramecium caudatum*, photoreversal, 735
Nuclease, desoxyribo-, and trypsin, chymotrypsin, and ribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
—, ribo-, and trypsin, chymotrypsin, and desoxyribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
Nucleic, deoxyribo-, acid synthesis, effect of chloramphenicol, and development of resistance to ultraviolet irradiation in *Escherichia coli* infected with bacteriophage T2, 553

OLFACTORY nerve fibers, 473
— perception in migrating salmon, L-serine, salmon repellent in mammalian skin, 889
Opsin and rhodopsin, acid-base properties, 909
— and rhodopsin, stability, effects of hydrogen ion concentration and aging, 923
Organic components of hemolymph of silkworm, *Bombyx mori*, and two other species, 853
Osmotic diuresis, effect on total electrolyte distribution in plasma and urine of aglomerular teleost, *Lophius americanus*, 349
Oxidative enzyme systems of honey bee, *Apis mellifera* L., 705

PACEMAKER fibers in sinus venosus of heart, vagal and sympathetic effects on, 715
Pancreas, protein synthesis in, uptake of glycine labelled with radioactive nitrogen by trypsinogen and chymotrypsinogen, 207
Paramecium caudatum, photoreversal of nuclear and cytoplasmic effects of short ultraviolet radiation on, 735
Permeability, protoplasmic, and antagonism, role of water in, 963
Phage. *See* Bacteriophage.
Photoreversal, increased, of ultraviolet injury by flashing light, 513
— of nuclear and cytoplasmic effects of short ultraviolet radiation on *Paramecium caudatum*, 735
Photosynthesis and respiration rates, *Chlorella*, effects of inhibitors on, 527
Photosynthetic characteristics and pigment content in blue-green alga, relations between, 11
Pigment content and photosynthetic characteristics in blue-green alga, relations between, 11
—, visual, lamprey, nature, 423

Plasma and urine of aglomerular teleost, *Lophius americanus*, osmotic diuresis and effect on total electrolyte distribution in, 349
Plasmodia, myxomycete, adenosinetriphosphate-sensitive protein system from, 325
Plasmodium of myxomycete, isolation of myxomyosin, adenosinetriphosphate-sensitive protein from, 801
Polyphosphates and magnesium, effect on mechanical properties of extracted muscle fibers, 789
Polysphondylium violaceum, *Dictyostelium discoideum*, and *Dictyostelium purpureum*, serological investigations of cell adhesion in, 813
Polysynaptic reflexes of spinal cord, post-tetanic potentiation, 197
Potassium transport, effect of sickling, 31
Potential, action, action current, and membrane resistance at node of Ranvier, parallelism between, 211
—, action, of single node of Ranvier, initiation and abolition, 377
—, resting, prepotential, and latent period, relations between in frog muscle fibers, 773
Potentiation, post-tetanic, of polysynaptic reflexes of spinal cord, 197
Proteases, extracellular, biosynthesis by *Serratia marcescens*, synthetic and gelatin media, 369
Protein, myxomyosin, adenosinetriphosphate-sensitive, isolation from plasmodium of myxomycete, 801
— synthesis in pancreas, uptake of glycine labelled with radioactive nitrogen by trypsinogen and chymotrypsinogen, 207
— synthesis in perfused rat liver, 567
— system, adenosinetriphosphate-sensitive, from myxomycete plasmodia, 325
Proteins, digestion by enzymes in presence of gelatin, 361
Proteolytic enzymes, interactions *in vivo* of non-specific inhibitor of hyaluronidase with hyaluronidase and, 185
Protoplasmic permeability and antagonism, role of water in, 963

RADIATION, short ultraviolet, photoreversal of nuclear and cytoplasmic effects on *Paramecium caudatum*, 735
Radioactive colloidal gold, kinetic analysis of *in vitro* uptake of radiocolloids by macrophages with, 625
— nitrogen labelling glycine, uptake by trypsinogen and chymotrypsinogen, 207
— sulfate, *in vitro* uptake by renal tissue of sulfate labelled with, 893
Radiocolloids, *in vitro* uptake by macrophages, kinetic analysis with radioactive colloidal gold, 625
Ranvier, node, parallelism between action potential, action current, and membrane resistance at, 211
—, node, single, action potential, initiation and abolition, 377
Receptors, stretch, abdominal, of crayfish, *Astacus fluviatilis* L., microanatomy, 69
Reflex variability, analysis in terms of partially correlated excitability fluctuation in population of motoneurons, 397
Reflexes, polysynaptic, of spinal cord, post-tetanic potentiation, 197
Renal. *See* Kidney.
Repellent, salmon, L-serine, in mammalian skin, 889
Resistance, membrane, action potential, and action current at node of Ranvier, parallelism between, 211

Respiration during germination and enlargement of spores of *Bacillus megatherium* and of fungus *Myrothecium verrucaria*, analysis, 301
— and photosynthesis rates, *Chlorella*, effects of inhibitors on, 527
— and silicon uptake in *Navicula pelliculosa*, 1
Retinene isomerase, 935
Rhodopsin and opsin, acid-base properties, 909
— and opsin, stability, effects of hydrogen ion concentration and aging, 923
Ribonuclease, desoxy-, and trypsin, chymotrypsin, and ribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
—, trypsin, chymotrypsin, and desoxyribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
Ribonucleic, deoxy-, acid synthesis, effect of chloramphenicol, and development of resistance to ultraviolet irradiation in *Escherichia coli* infected with bacteriophage T2, 553

SALMON, migrating, olfactory perception in, L-serine, salmon repellent in mammalian skin, 889
Sensory nerve cells, single isolated, of lobster and crayfish, processes of excitation in dendrites and in soma, 87
L-Serine, salmon repellent in mammalian skin, 889
Serological investigations of cell adhesion in slime molds, *Dictyostelium discoideum*, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, 813
Serratia marcescens, synthetic and gelatin media, biosynthesis of extracellular proteases by, 369
Sickling, effect on potassium transport, 31
—, effect on sodium and cesium transport, 55
Silicon metabolism in diatoms, respiration and silicon uptake in *Navicula pelliculosa*, 1
Silkworm, *Bombyx mori* L., *in vitro* culture of tissue from, 841
—, *Bombyx mori*, and two other species, organic components of hemolymph, 853
Sinus venosus of heart, vagal and sympathetic effects on pacemaker fibers in, 715
Skin, mammalian, L-serine, salmon repellent in, 889
Slime molds, *Dictyostelium discoideum*, *Dictyostelium purpureum*, and *Polysphondylium violaceum*, serological investigations of cell adhesion, 813
Sodium and cesium transport, effect of sickling, 55
Solutions, actomyosin, effect of adenosinetriphosphate, studied with recording dual beam light-scattering photometer, 821
Soma, dendrite, and axon excitation in single neurons, 121
— and dendrites of single isolated sensory nerve cells of lobster and crayfish, processes of excitation in, 87
Spinal cord, polysynaptic reflexes, post-tetanic potentiation, 197
Spores, *Aspergillus flavus*, effects of subzero temperatures on viability, effect of rate of warming, 869
— of *Bacillus megatherium* and of fungus *Myrothecium verrucaria*, analysis of respiration during germination and enlargement of, 301
Squid giant axon, kinetics of ion movement in, 279
Stretch receptors, abdominal, of crayfish, *Astacus fluviatilis* L., microanatomy, 69

Sulfate labelled with radioactive sulfate, *in vitro* uptake by renal tissue, 893
Sulfhydryl groups and structure of hemoglobin, 585
Sympathetic and vagal effects on pacemaker fibers in sinus venosus of heart, 715
Synaptic inhibition in isolated nerve cell, 155

TELEOST, aglomerular, *Lophius americanus*, osmotic diuresis, and effect on total electrolyte distribution in plasma and urine of, 349
Temperatures, subzero, effects on viability of *Aspergillus flavus* spores, effect of rate of warming, 869
Tissue from silkworm, *Bombyx mori* L., *in vitro* culture, 841
—, renal, *in vitro* uptake of sulfate labelled with radioactive sulfate by, 893
Titration results, acid and base, hydrogen ion concentration, particle asymmetry, irreversible binding of methylene blue, ultraviolet absorption, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Tobacco mosaic virus, aggregation reactions and basic dye binding, variation of hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Transport, cation, in yeast, 687
—, potassium, effect of sickling, 31
—, sodium and cesium, effect of sickling, 55
Triphosphate, adenosine-, effect on actomyosin solutions, studied with recording dual beam light-scattering photometer, 821
Triphosphate, adenosine-, sensitive protein, myxomyosin, isolation from plasmodium of myxomycete, 801
—, adenosine-, sensitive protein system from myxomycete plasmodia, 325
—, adenosine-, stoichiometric amounts regenerated in coupled enzyme system, effect upon actomyosin, 831
Trypsin, chymo-, and trypsin, ribonuclease, and desoxyribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
—, chymotrypsin, ribonuclease, and desoxyribonuclease, effect on active, inactive, and reversibly inactivated *megatherium* bacteriophage, 251
Trypsinogen, chymo-, and trypsinogen, of pancreas, uptake of glycine labelled with radioactive nitrogen by, 207
— and chymotrypsinogen of pancreas, uptake of glycine labelled with radioactive nitrogen by, 207

ULTRAVIOLET absorption, hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, variation of, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
— injury, increased photoreversal by flashing light, 513
— irradiation in *Escherichia coli* infected with bacteriophage T2, effect of chloramphenicol on deoxyribonucleic acid synthesis, and development of resistance to, 553
— radiation, short, photoreversal of nuclear and cytoplasmic effects on *Paramecium caudatum*, 735

Urine and plasma of aglomerular teleost, *Lophius americanus*, osmotic diuresis and effect on total electrolyte distribution in, 349

VAGAL and sympathetic effects on pacemaker fibers in sinus venosus of heart, 715
Virus, tobacco mosaic, aggregation reactions and basic dye binding, variation of hydrogen ion concentration, particle asymmetry, acid and base titration results, irreversible binding of methylene blue, ultraviolet absorption, and extent of heat denaturation in tobacco mosaic virus solutions with time of standing, 437
Vision, nature of lamprey visual pigment, 423

WATER flow through frog gastric mucosa, 535
—, role in protoplasmic permeability and in antagonism, 963
Wing beat frequency and aging of flies, mitochondrial cytochrome *c* in insect flight muscles in relation to, 497

YEAST, cation transport in, 687
